Marsh mallow	Althea officinalis	9cm	£6	Attractive perennial growing to 1.2 m. Leaves eaten raw or cooked, also flowers. Roots are used medicinally.	P
Marsh mallow	Althea officinalis	2l	£8	Attractive perennial growing to 1.2 m. Leaves eaten raw or cooked, also flowers. Roots are used medicinally.	P
Mint Bowles	Mentha suaveolens	9cm	£4	Perennial, easy to grow. Shade tolerant. Forms a dense cover, grows to 1 metre when flowering. Tea plant.	P
Mint Bowles 2L	Mentha suaveolens	2l	£6	Perennial, easy to grow. Shade tolerant. Forms a dense cover, grows to 1 metre when flowering. Tea plant.	P
Mint Black Peppermint	Mentha x piperita	9cm	£4	Perennial, easy to grow. Benefits from a sunny spot. Beautiful brown/purple leaves. Great for tea.	P
Mint Black Peppermint 2L	Mentha x piperita	2l	£6	Perennial, easy to grow. Benefits from a sunny spot. Beautiful brown/purple leaves. Great for tea.	P
Mint Chocolate	Mentha x piperita	9cm	£4	Perennial, easy to grow. Benefits from a sunny spot. Beautiful brown/purple leaves. Chocolate-mint scent. Great for tea.	P
Mint Chocolate 2L	Mentha x piperita	2l	£6	Perennial, easy to grow. Benefits from a sunny spot. Beautiful brown/purple leaves. Chocolate-mint scent. Great for tea.	P
Mint Moroccan	Mentha	9cm	£4	Strong growing mint that forms a mat and spreads by rhizomes. Very good for fresh mint tea or in a mojito.	P
Mint Moroccan 2L	Mentha	2l	£6	Strong growing mint that forms a mat and spreads by rhizomes. Very good for fresh mint tea or in a mojito.	P
Mint Strawberry	Mentha x piperita	9cm	£4	Less vigorous mint. Sweet scent. Good for salads and cocktails. Benefits from a warm, sheltered spot.	P
Mint Strawberry 2L	Mentha x piperita	2l	£6	Less vigorous mint. Sweet scent. Good for salads and cocktails. Benefits from a warm, sheltered spot.	P
Oregano	Origanum vulgare	9cm	£4	Well known herb for cooking italian flavours, yet is a UK native. Can be harvested before flowering to air dry for later use. Bees love the flowers.	P
Oregano 2L	Origanum vulgare	2l	£6	Well known herb for cooking italian flavours, yet is a UK native. Can be harvested before flowering to air dry for later use. Bees love the flowers.	P
Sage common	Salvia officinalis	9cm	£4	Well known Herb for cooking and teas. May help with sore throats.	P
Sage common 2L	Salvia officinalis	2l	£6	Well known Herb for cooking and teas. May help with sore throats.	P
Sage purple	Salvia officinalis purpurea	9cm	£4	Well known Herb for cooking and teas. May help with sore throats. Beautiful purple foliage and occasionally purple flowers in late summer. Mat forming, less upright than our common sage.	P
Sage purple 2L	Salvia officinalis purpurea	2l	£6	Well known Herb for cooking and teas. May help with sore throats. Beautiful purple foliage and occasionally purple flowers in late summer. Mat forming, less upright than our common sage.	P
Strawberry Wild (hybrid)	Fragaria vesca	9cm	£4	Spreading ground cover grows in deep shade. Highly flavoured strawberries produced from May to October.	P
Thyme Jekka	Thymus 'Jekka'	9cm	£4	Large leaved, hardy, spreading culinary thyme. Abundance of pink flowers early summer.	P
Thyme Jekka 2L	Thymus 'Jekka'	2l	£6	Large leaved, hardy, spreading culinary thyme. Abundance of pink flowers early summer.	P
Yarrow Tutti Frutti Pink Grapefruit	Achillea millefolium	9cm	£5	Yarrow with bright pink flowers, fading to pale. Compact, mounding habit. Drought tolerant.	P
Yarrow Tutti Frutti Pink Grapefruit	Achillea millefolium	2l	£7	Yarrow with bright pink flowers, fading to pale. Compact, mounding habit. Drought tolerant.	P
Dye plants					
Dyers Coreopsis	Coreopsis tinctoria	9cm	£4		A
Dyers Chamomile 9cm	Anthemis tinctoria	9cm	£5	Perennial slightly aromatic with yellow flowers that can be used to make a yellow dye. Cut back to the base in winter and mulch, it will grow back in Spring.	P
Dyers Chamomile 2l	Anthemis tinctoria	2l	£7	Perennial slightly aromatic with yellow flowers that can be used to make a yellow dye. Cut back to the base in winter and mulch, it will grow back in Spring.	P
Madder	Rubia tinctorum	9cm	£6	Slow growing rambling and spreading perennial, will climb up supports. Related to cleavers and almost as 'sticky'. Roots used to dye a lightfast red colour.	P
Madder	Rubia tinctorum	2l	£8	Slow growing rambling and spreading perennial, will climb up supports. Related to cleavers and almost as 'sticky'. Roots used to dye a lightfast red colour.	P
Woad	Isatis tinctoria	9cm	£5	Hardy biennial. Leaves used as blue dye. Seeds for pink dye. Self seeds.	B
Woad 2L	Isatis tinctoria	2 litre	£7	Hardy biennial. Leaves used as blue dye. Seeds for pink dye. Self seeds.	B

Weld

Reseda luteola

9cm

£5

Biennial wildflower for dyeing a bright lightfast yellow

B

Vegetables

American land cress	Barbarea verna	9cm	£4	Hardy biennial self seeder. Ground level mustardy salad leaf, with large leaves.	B
Babington's leek (1 plant)	Allium ampeloprasum babingtonii	9cm	£5	Native to the UK. A perennial leek. Can be cut off at the base, leaving a bulb in the ground. Eaten the same as leeks. In the wild, grows in sandy, stony soil but seems unfussy. Grows from late winter until summer, then dies back to the bulb. Produces bulbils on top of sterile flowerheads every few years.	P
Babington's leeks (3 plants)	Allium ampeloprasum babingtonii	2 litre	£10	Native to the UK. A perennial leek. Can be cut off at the base, leaving a bulb in the ground. Eaten the same as leeks. In the wild, grows in sandy, stony soil but seems unfussy. Grows from late winter until summer, then dies back to the bulb. Produces bulbils on top of sterile flowerheads every few years.	P
Caucasian spinach	Hablitzia tamnoides	9cm	£6	Perennial, hardy 'spinach' for dappled shade, very hardy, climbing in its 2nd year. Can grow very high in right conditions. Rewards you for giving it rich, fertile soil.	P
Caucasian spinach 2L	Hablitzia tamnoides	9cm	£8	Perennial, hardy 'spinach' for dappled shade, very hardy, climbing in its 2nd year. Can grow very high in right conditions. Rewards you for giving it rich, fertile soil.	P
Chinese vegetable mallow	Malva verticillata	9cm	£5	Annual or biennial that grow up to 1.7+ metres and can inhabit woodland areas of different soil types. The small flowers are white/pink. Ornamental, and leaves used for salad or cooked.	A
Chinese vegetable mallow 2L	Malva verticillata	2l	£7	Annual or biennial that grow up to 1.7+ metres and can inhabit woodland areas of different soil types. The small flowers are white/pink. Ornamental, and leaves used for salad or cooked.	A
Good king Henry	Blitum bonus henricus	9cm	£6	Native perennial spinach substitute that tolerates shade.	P
Good king Henry 2l	Blitum bonus henricus	2l	£8	Native perennial spinach substitute that tolerates shade.	P
Kale Daubentons	Brassica oleracea var ramosa	9cm	£6	Perennial kale growing to shrub size. Hardly ever flowers. Small, soft leaves.	P
Kale Taunton Deane	Brassica oleracea	9cm	£6	Perennial kale growing to large shrub size. Hardly ever flowers, so is long lived. Purple tinged stems. Mild flavour.	P
Kale Taunton Deane 2l	Brassica oleracea	2l	£8	Perennial kale growing to large shrub size. Hardly ever flowers, so is long lived. Purple tinged stems. Mild flavour.	P
Kale Cavolo Nero Black Magic	Brassica oleracea	8cm	£2 or mix 3 for £5	Specially bred for the UK climate, this kale has very dark leaves that can be eaten as baby leaf or left to mature and cooked. Cold hardy. Grow in full sun in rich soil.	B
Kale Red Russian	Brassica oleracea	8cm	£2 or mix 3 for £5	Wavy leaf with a red-purple stem and vein. It is very sweet and tender in comparison to most kales. It can be picked young and eaten raw as baby-leaf or grown as mature plants. It is frost hardy and the colour darkens in autumn.	B
Marsh Samphire/Glasswort	Salicornia europaea	9cm	£6	Short lived perennial, crunchy salty salad or eat cooked. Best for pots as needs to be watered with salty water	P
Minutina aka Erba Stellar	Plantago coronopus	9cm	£4	Perennial/biennial depending on climate. Salad /spinach substitute available all year round. Very hardy, low growing. Self seeds.	P
Musk mallow	Malva moschata	9cm	£5	Pretty upright perennial to 90cm, bulking out year on year. All parts are edible. A musky scent from flowers in the evening.	P
Musk mallow 2L	Malva moschata	2l	£7	Pretty upright perennial to 90cm, bulking out year on year. All parts are edible. A musky scent from flowers in the evening.	P
Onion bunching (Welsh), Ishikura	Allium fistulosum	9cm	£4	Like an enduring fat spring onion. Stays green year round. Bumblebees like the big white flower heads.	P
Pink Dandelion	Taraxacum pseudorosarium	9cm	£5	Beautiful, slightly less vigorous version of our much maligned yellow dandelion.	B
Plantain Purple	Plantago major rubrifolia	9cm	£4	A beautiful dark purple form of the native, valuable broadleaf plantain. Tolerates poor soil. Edible young leaves.	B
Salad burnet	Sanguisorba minor	9cm	£4	Its leaves are famous for smelling of cucumber if crushed or walked upon, and this plant lives up to its name as a popular addition to salads and summer drinks.	P
Sorrel green de Belleville	Rumex acetosa	9cm	£4	A cultivated form of our edible native wildflower which is often found in grasslands, woodland edges and roadside verges. This variety has large leaves, good to eat early in the year, has a distinct, lemony flavour. Use small leaves in salads, bunches of larger leaves can be cooked as a lemony spinach substitute.	P
Sorrel Profusion	Rumex acetosa	9cm	£5	Perennial large leaved sorrel that never flowers. Leaves available from March to November.	P
Sorrel Profusion 2L	Rumex acetosa	2l	£7	Perennial large leaved sorrel that never flowers. Leaves available from March to November.	P
Sorrel red veined	Rumex sanguineus	9cm	£5	Perennial salad leaves with slightly bitter leaves. Attractive red vein colouring. In growth most of the year. Tolerates part-shade.	P
Sorrel red veined 2L	Rumex sanguineus	2l	£7	Perennial salad leaves with slightly bitter leaves. Attractive red vein colouring. In growth most of the year. Tolerates part-shade.	P

Wildflowers

Evening primrose	Oenothera biennis	2l	£6	Wildflower. Attracts bees, butterflies and moths. Yellow flowers on a tall stalk.	B
Red campion	Silene dioica	2l	£6	Native UK wildflower. Red flowers. Grows best in light shade, as a woodland-edge dweller.	P
Ragged robin	Lychnis flos cuculi	9cm	£5	Native UK wildflower. With narrow leaves and divided pink or white flowers. Favoured by honeybees.	P
Ragged robin	Lychnis flos cuculi	2l	£7	Native UK wildflower. With narrow leaves and divided pink or white flowers. Favoured by honeybees.	P

Roots and tubers

Sunchokes	Helianthus tuberosus	9cm	£6	Perennial plant for edible tubers harvested in autumn, also a good seasonal windbreak. Grow in sun. In the sunflower family, so in some summers will produce small sunflowers. Very little care needed, good famine plant. Contains inulin, which some may find a little hard to digest. Roast like potatoes but not for as long, or can be pickled.	P
Sunchokes	Helianthus tuberosus	5 tubers	£4	Perennial plant for edible tubers harvested in autumn, also a good seasonal windbreak. Grow in sun. In the sunflower family, so in some summers will produce small sunflowers. Very little care needed, good famine plant. Contains inulin, which some may find a little hard to digest. Roast like potatoes but not for as long, or can be pickled.	P
Chinese artichokes	Stachys affinis	2l	£6		P
Comfrey Bocking 14	Symphytum x uplandicum	9cm	£4	Deep rooting mineral accumulator, high in potassium. Leaves used to make plant feed. Can be cut up to 4 times a year if in fertile soil.	P
Comfrey Bocking 14	Symphytum x uplandicum	2l	£8	Deep rooting mineral accumulator, high in potassium. Leaves used to make plant feed. Can be cut up to 4 times a year if in fertile soil.	P
Comfrey Bocking 14	Symphytum x uplandicum	4x 4-6inch root cuttings	£6	Deep rooting mineral accumulator, high in potassium. Leaves used to make plant feed. Can be cut up to 4 times a year if in fertile soil.	P
Yacon	Smallanthus sonchifolius	2L	£8	The yacon is related to dahlias, traditionally grown in the Andes for its crisp, sweet-tasting, tuberous roots.	P
Horseradish 9cm	Armoracia rusticana	9cm	£4	Easily grown native perennial. Roots and leaves can be eaten, use roots for hot horseradish sauce.	P
Horseradish	Armoracia rusticana	2l	£6	Easily grown native perennial. Roots and leaves can be eaten, use roots for hot horseradish sauce.	P
Horseradish	Armoracia rusticana	6 inch+ root	£4	Easily grown native perennial. Roots and leaves can be eaten, use roots for hot horseradish sauce.	P

Skirret

Sium sisarum

2l

£8

Introduced by the Romans but unfortunately largely forgotten. A perennial parsnip, sort of. Delicious, nutty roots form like fingers, cook by boiling or roasting briefly. Some roots have a tendency to have a woody core. Great pollinator plant, being an umbel it's attractive to hoverflies. Grows to 1.8m. Unfussy - sun to semi-shade, does better when wet.

p

Shrubs

Betty Ashburner ground cover raspberry	Rubus	9cm	£4	Fast growing arching ground cover. Fluffy canes, not thorny. Produces small raspberry like mild fruit, if pollinated by R.pentalobus or R.tricolor. Semi-shade tolerant.	P
Betty Ashburner ground cover raspberry 2l	Rubus	2l	£6	Fast growing arching ground cover. Fluffy canes, not thorny. Produces small raspberry like mild fruit, if pollinated by R.pentalobus or R.tricolor. Semi-shade tolerant.	P
Jostaberry	Ribes x nidigrolaria	10l	£10	A hybrid berry, cross of gooseberries and blackcurrant. Fruit the size of gooseberry, tastes like a mild blackcurrant, good to add to preserves and desserts or stewed with other fruit for porridge, muesli etc. A fast, strong growing shrub to 2m. Soil grown, potted March 2022.	P
Gooseberry Black Velvet	Ribes hybrid	5l	£8	A gooseberry-worcesterberry. Strong, upright bush giving good crops from the second year. The fruit is sweet, red and delicious.	P
Saltbush / sea orach	Atriplex halimus	2l	£6	A salad shrub. Yes, many say the leaves have a taste of salt! Grows best in full sun, poor soil.	P
Blackcurrant Ben Nevis	Ribes nigrum	Bareroot 40cm+, 2 years old		Check availability early winter 2022. Bareroot season starts once leaves drop.	P
Elder Black Lace	Sambucus nigra	Bareroot 70cm+		Check availability early winter 2022. Bareroot season starts once leaves drop.	P

Trees

Szechuan pepper	Zanthoxylum piperitum	5 litre (40cm+)	£20	Medium shrub. Produce a small, red fruit with a black shiny seed inside in the Autumn. Best in sun, drought tolerant and not fussy about soil type. Can be container grown. Brilliant foliage in autumn - leaves turn yellow then red.	P
False acacia	Robinia pseudoacacia	5 litre (100cm+)	£18	Very limited number remaining, since a mouse ringed a lot of them. We won't be sowing more this year.	P
Strawberry tree	Arbutus unedo	3 litre (1 year old)	£14	Evergreen, slow growing small tree. Ultimate height 8-10m. Produces fruit that look like strawberries, best for cooking - may also be enjoyed by wild birds. Grow in a sheltered spot, in full sun.	P
